

FUSION IS PART OF THE SOLUTION

82% OF EUROPEANS KNOW THAT THE WAY
WE PRODUCE AND CONSUME ENERGY HAS
A NEGATIVE IMPACT ON CLIMATE

IT'S TIME TO TAKE ACTION!
WE NEED TO IMPROVE OUR ENERGY MIX

ITER will be the world's largest experimental fusion facility contributing towards a safe and environmentally sustainable energy mix.

Europe finances almost half of the costs of its construction. The other six Members (China, Japan, India, the Republic of Korea, the Russian Federation and the USA) are contributing equally to the rest.

Fusion for Energy (F4E) is the European Union's organisation responsible for Europe's contribution to ITER.
