

## Curriculum Vitae - Kevin Baker

Kevin Baker was appointed as Head of the Project Management Infrastructure & Control Department in March 2016.

Prior to joining F4E he has held many senior management and executive level positions in the aerospace industry.

He graduated from Nottingham University, UK with a first class honours degree in Theoretical Mechanics, and then started his career as a systems engineer in the space industry. He took on various engineering management roles of increasing seniority, culminating with being appointed as Head of Commercial and Programmes in Astrium UK EOS Division.

In 2000 he joined Airbus and undertook various executive level roles in project and programme management, including Head of Engineering Projects for Airbus UK, Programme Manager, UK for Airbus' short haul aircraft, and Head of PM Deployment in the Airbus transnational Centre of Competence for P&PM.

He has also lectured at undergraduate and MBA level on project management

He brings to F4E a deep experience of the challenges involved in the development of complex and highly integrated technical systems.
