

### Curriculum Vitae

Elena Gaio

PERSONAL INFORMATION

# Elena Gaio

- Via Gasparo Zonta, 7 Padova 35128, Italy
- 📞 +39 0498295985 📋 +39 339 5448636
- 🔀 elena.gaio@igi.cnr.it

Sex F | Date of birth 18/08/1958 | Nationality Italian

| POSITION             | Senior Researcher with National Research Council, seconded to Consorzio RFX   |
|----------------------|---|
| TYPE OF BUSINESS     | Fusion machines systems and operation electrical technologies, power circuits and systems   |
| WORK EXPERIENCE      |   |
| Jan 2015 – today     | <ul> <li>Coordinator of the design and R&amp;D work on the "EU DEMO Plant Electrical System" (EUROfusion) – selected for the position of Project leader in FP9</li> <li>Coordination of the studies to outline the DEMO Plant Electrical System also with the aim to achieve a more complete and realistic Balance of Plant description.</li> <li>Sector system design, R&amp;D, general machine systems, engineering analysis</li> </ul>   |
| Jan 2009 – today     | <ul> <li>Power Systems Group Leader</li> <li>To program and coordinate the activities of the research group (10 researchers)</li> <li>To promote the competency growth and the scientific production of the researchers</li> <li>-To contribute to the actuation of the Consorzio RFX scientific programs</li> <li>Sector R&amp;D, engineering analysis, design and experimental activities on power supply systems.</li> <li>Electrical technologies, circuits and systems for fusion experiments: power supplies for ohmic and additional heating, for MHD plasma instabilities control, dc current interrupters.</li> <li>The applications of the group research activities are in the frame of the main Consorzio RFX programs: the RFX-mod experiment, the development and realization of ITER Neutral Beam Test Facility (NBTF), the Italian Divertor Tokamak test Facility, the contribution to the Broader Approach, the studies for the european DEMO reactor under the Eurofusion program.</li> </ul> |
| 2007 – today         | <ul> <li>Responsible of the Consorzio RFX activities and projects for the JT-60SA tokamak in the frame of the BA Agreement</li> <li>Coordination of the Consorzio RFX activities (budget: 15 M€), within the JT-60SA international project team, for the realization of the satellite tokamak JT-60SA.</li> <li>The activities have been mainly addressed to general machine system studies, engineering analysis for identifications of requirements, for the selection of suitable design solutions, experimental activities for prototypes development and then all the accompanying activities for the procurement of the two systems to be provided by Consorzio RFX. More recently, the participation in the PS commissioning and integrated commissioning.</li> </ul>  |
| Dec 2009 – July 2015 | <ul> <li>Responsible of the contract for the QPC system procurement</li> </ul>  |
| Dec 2009 – July 2015 | <ul> <li>Responsible of the contract for the procurement of the PS system for RWM control</li> <li>Both the procurements were completed on time and on budget.</li> </ul>   |
|                      | <ul> <li>Sector Management of R&amp;D tasks, engineering analysis, projects and industrial contracts</li> </ul>   |
| Feb 2016 – July 2017 | <ul> <li>Project leader of the electrical area of the ITER Neutral Beam Test Facility</li> <li>Coordination of the activites related to the electrical components and systems of the NBTF plant and the SPIDER and MITICA projects.</li> <li>Coordination of the R&amp;D task to investigate issues related to the design and operation of RF drivers for NB negative ion sources and to increase the knowledge and competences in the field</li> <li>Sector engineering analysis, management of scientific and technical tasks and of contracts follow-up</li> </ul>   |

| to <b>puss</b>  | Curriculum Vitae Elena Gaio   |
|---|---|
| 2003 – 2008   | <ul> <li>Conceptual design development of the ITER NBI PS system</li> <li>Substantial contribution in the R&amp;D and design activities for conceiving the alternative design, finally adopted for the ITER NBI and those of MITICA and SPIDER</li> <li>Sector R&amp;D, engineering analysis, design activities, preparation of specification for procurements</li> </ul>   |
| Nov 2000 –Dec 2003  | <ul> <li>Project Leader and contract Responsible for the restoration and upgrade of the 400 MVA ac/dc converter system of RFX and of the system for the protection signals handling for RFX experiment:</li> <li>To conduct the studies and analyses for the development of the design, "ad hoc" test definition, and integrated tests with the overall RFX power supply – machine</li> <li>To manage the industrial contract for the system procurement (3 M€)</li> <li>Sector engineering analysis, management of scientific projects and industrial contracts</li> </ul>   |
| Nov 2000 –Dec 2003  | <ul> <li>Project Leader and contract Responsible for the development and procurement of the Power Supply System for MHD control for RFX experiment:</li> <li>To conduct the studies and analyses for the development of the design, "ad hoc" test definition, and integrated tests with the overall RFX power supply – machine</li> <li>To manage the industrial contract for the system procurement (2 M€)</li> <li>Sector engineering analysis, management of scientific projects and industrial contracts</li> </ul>   |
| Nov 2000 –Dec 2003  | <ul> <li>Project Leader for the restoration and upgrade of the Pulse Discharge Cleaning system for RFX:</li> <li>To conduct the studies for the upgrade of the control system</li> <li>To manage the industrial contract for the system procurement (0,35 M€)</li> <li>Sector engineering analysis, management of scientific projects and industrial contracts</li> </ul>   |
| 1997-1999<br>2004-2005  | <ul> <li>Conduction of the RFX experimental session</li> <li>technical management of the sessions</li> <li>coordination of the session team in charge for the plant system operation (about 20 persons)</li> <li>Sector General machine operation</li> </ul>  |
| 1998-2008   | <ul> <li>Leader of the technical electrical area for RFX machine</li> <li>Coordination of the group of technicians in charge for the electrical systems of the RFX</li> <li>Sector General machine operation</li> </ul>   |
| 1993 – 2009<br>2004 -2007<br>2004 - 2009  | <ul> <li>Responsible Officer for RFX machine systems:</li> <li>ac/dc converter system, rated for a power of more than 400 MVA</li> <li>power supply system for MHD control</li> <li>pulse discharge cleaning system</li> <li>Activities management of the system operation, maintenance, documentation and upgrades</li> <li>Sector General machine operation</li> </ul>  |
| Sep 2008 – Dec 2011<br>Nov 2009 – June 2010<br>June 2000 – April 2003<br>June 2000 – June 2001<br>1996 – Dec 1999<br>Oct. 2000 – Dec. 1999<br>Oct. 2000 – Dec. 1999<br>June 1996 – July 1998<br>1990 – 1995 | <ul> <li>Participation in other projects and spin – offs:</li> <li>Design studies for the PS of the active in-vessel coils for MHD control in Asdex Upgrade</li> <li>Design studies for the realization of the Enhanced Radial Field Amplifier (ERFA)</li> <li>Experimental Assessment of Switches for the ITER Discharge Circuits</li> <li>Studies on the dynamic response of the ITER converter for plasma vertical stabilization</li> <li>R&amp;D / realization / operation of fast converters for active control of field errors at the RFX shell gaps</li> <li>New bypass protection of a series compensation system in arc furnace plants</li> <li>High-voltage booster project for railways</li> <li>Technological development for the ITER 45 kA -1.5kV thyristor bridge prototype</li> <li>Development of the first real time control for RFX</li> </ul> |

- Activities R&D, engineering analyses
- Sector electrical technologies, power supply and protection systems

Main educational activities

## PHD supervision

| 2019 - today  | <ul> <li>Advanced converter topologies and energy storage schemes for fusion experiments (funded by<br/>industry)</li> </ul>  |
|---|---|
| 2017- 19  | <ul> <li>Development and validation of suitable models of power supply systems in support of the SPIDER<br/>integrated tests and first operation</li> </ul>   |
| 2015 – 17   | <ul> <li>Studies and experimental activities to qualify the behavior of RF power circuits for Negative Ion<br/>Sources of Neutral Beam Injectors for ITER and fusion experiments.</li> </ul>  |
| 2014 - 16<br>2009 - 11<br>2008 - 10   | <ul> <li>Characterization of the dielectric strength in vacuum of RF drivers for fusion Neutral Beam Injectors</li> <li>Studies on the impact of the ITER Power Supply system on the Pulsed Power Electrical Network</li> <li>Analyses and experimental tests for the development of the Quench protection Systems for the superconducting magnets of the satellite tokamak JT-60SA</li> </ul>  |
| 2014 - 15   | <ul> <li>EFDA Fellowship</li> <li>Dynamic stability of the ITER electrical network - Development and validation of suitable analytical models</li> </ul>  |
| 2010 - 12   | <ul> <li>Coordination of the EFDA Task Agreement WP08-GOT-PSE - the European Goal Oriented Training programme in the field of Power Systems Engineering</li> <li>Five Institutions: Consorzio RFX, CEA, CCFE, Enea-Frascati and KIT participate in this Program.</li> <li>The aim of this training was to prepare researchers for activities in the field of Power Supply Engineering to support the ITER project and the long-term fusion program.</li> </ul>  |
|   | Contract Professor at the Electronic Engineering Department of the Padova<br>University   |
| a. y. 2003/04 - 2008/2009   | <ul> <li>Teacher of the Industrial Electronic course (54 hours) - III year of the Bachelor Degree in Electronic Engineering</li> <li>Supervisor of several bachelor and doctor degree thesis in Electrical or Electronic Engineering – Padova University</li> </ul>   |
| EDUCATION AND TRAINING  | _   |
|   |   |
| 1984<br>1977-1982   | Master in engineering of plasma and controlled thermonuclear fusion<br>Master degree in Electronic Engineering at the University of Padova  |
